

## Operation

Pyrogen EXA-M Marine Application is pre-engineered aerosol fire suppression system specifically designed for protection of engine room / compartments, machinery spaces and fuel room, has been our prime market in Asia Australia, US and Europe for many years. We have protected thousands of vessels including Sydney Ferries, Cruises, Police Boats, Yachts, Fishing Boats, Fuel Barge and many other small to medium vessels worldwide.

Pyrogen has been approved by the CSIRO Australia under ActivFire Registration Scheme National Maritime Safety Committee under the Register of Compliant Equipment and ABS Certification for International Vessels.

Pyrogen Marine Kit is a complete aerosol fire suppression system kit specifically designed as a low cost, simple solution to the difficult task of protecting your vessel from ravages of fire.

Pyrogen Marine Kit consists of an EXA-M™ extinguishing module and accessories with an option of a automatic and manual electrical operation or manual pull-ring operation.

# PYROGEN

## EXA-M MARINE APPLICATION Pre-Engineered Aerosol Fire Suppression System Kit

### UNIQUE CHARACTERISTICS :
